

## Online Forms Default Font Size Change

---

On March 1, 2007 OREF Online Forms default font size for all form fields will change from 8 point to 10 point.

In July 2006, OREF provided the ability to change the font size on form fields. Since that functionality was released, we received many requests to make the default font size larger.

Users will still have the ability to change the font size on their forms from 8 point to 12 point by using the Formatting button.
