

Increase Font Size on Forms

On July 12, 2006 OREF released a major enhancement to the Online Forms program to allow users to increase the font size on the fill-in fields up to 12 point. This enhancement will greatly reduce the readability issues when forms are faxed to and from several offices.

The feature is activated each time a form is created. A new button on the toolbar shows the option of changing the format of the fill-in fields.

When this button is clicked, a dialog box will appear in which you can choose a font size (from 8 – 12) and a color (black, blue or purple). Once the user chooses a size and/or color and clicks OK, all the form fields on the target form are updated to these settings. The font changes do not affect the form content – only the form fields.
