

Valerie Brown-Campbell

Biography

zipLogix™ Training Manager

Valerie Brown-Campbell has spent the last 28 years of her career as a technologies trainer in both corporate and private sectors, for non-profit organizations, as well as for her own business. The majority of her training had been conducted face-to-face to audiences ranging from 1 to 100.

Although Valerie's passion for training has taken her across the country as a Senior Technology Training Specialist, she now holds the title of Training Manager at zipLogix™, where she manages an in-house team of Training Specialists and nearly fifty active Certified Trainers throughout the country. Earlier this year Valerie launched a new zipForm® "**Learning Paths**" curriculum which can be accessed from the zipLogix.com website. The curriculum offers live webinar training to users based on their zipForm® product experience. Valerie teaches the full zipLogix™ suite of products including zipForm® Plus, zipTMS™, zipForm® Mobile, zipLogix Digital Ink®, and zipFormMLS-Connect®. She also produces training videos located on the zipLogix™ YouTube Channel, and personally conducts live online webinars to hundreds of zipForm® Plus users.

Valerie launched the online zipLogix Academy™ which house "**All Things Training**", and where interested Agents and Administrators have an opportunity to become zipLogix™ Certified Trainers. When asked what she likes best about training, Valerie replied, "*When I teach technology features and see the proverbial "light-bulb" turn on, followed by a smile; I know then, the training was successful. I bring Enthusiasm, Expertise, and Experience to every training session that I deliver, and having students say they learned things that will help them conduct their business more efficiently, is time well spent.*"
